

**PHENYL-AZA-BENZIMIDAZOLE COMPOUNDS FOR MODULATING IgE AND  
INHIBITING CELLULAR PROLIFERATION**

Abstract of the Disclosure

The present invention is directed to small molecule inhibitors of the IgE response to allergens, which are useful in the treatment of allergy and/or asthma or any diseases where IgE is pathogenic. This invention also relates to phenyl-aza-benzimidazole molecules that are cellular proliferation inhibitors and thus are useful as anticancer agents. This invention further relates to small molecules which suppress cytokines and leukocytes.
